

Licence Free Portable Radio

PMR446 radios can offer an effective and low-cost communication solution providing general purpose radio communications. Their range is dependent on many factors like environment (in-city range is far less than in an open field), your height above surrounding obstructions and to a lesser extent weather conditions.

For Higher Grade Communications

As PMR446 radio can be used by anyone, including baby monitors should you require radios for private or mission critical applications you should consider using Digital Licence free radios or radios from our Licensed portable range.

KENWOOD TK-3301

Standard package comprises
